Commercial packaging

Your commercial packaging can reach **two types of commerces**, which become the waste final holders.

1

Final holders with comprehensive management agreement

Own management of more than 80%* of its waste** (most of which does not end up in the municipal channel).
For example: large retailers.

Signing of an agreement with Ecoembes for compliance and alignment with current regulations, certifying the quantities of waste managed.

Prices of comprehensive management option (€0) for the kg that reach these stores.

* In 2025, 80% will apply. Rest of the years, 85% will apply.
** List of establishments available at the end of each year.

2

Other final holders

Other establishments without their own management at these levels or with full responsibility for municipal channels or intermediaries.
For example: small stores.

We reach agreements with the final holders and public administrations.

Prices for other types of management options for the KG that reach these stores.
